

The architectural floor plan shows a building with a large terrace on the left and several rooms on the right. The terrace is labeled "terrazzo mq. 41" and is divided into a grid of squares. Two small square features, possibly windows or vents, are located on the terrace's perimeter. The building's footprint includes a large room labeled "stendiloko" with dimensions 356 and 440, and a height of $h=230$. Adjacent to it is a smaller room with dimensions 100 and 210, and a height of $h=230$. A curved wall with a radius of 82 is also shown. Other rooms include a bathroom with dimensions 100 and 180, and a kitchen area with dimensions 100 and 190. A staircase is located near the top right, with a width of 460. The plan also shows a small room with dimensions 86 and 213, and a curved wall with a radius of 82. The overall layout is compact and functional, with a clear distinction between the outdoor terrace and the indoor living spaces.
